

KID'S NAME

.....

- 1 Print size chart sample sheet.
- 2 Align the child's heel, barefoot, standing up, with the dotted line.
- 3 Ensure that the child's weight is equally spread on both feet.
- 4 Take the measure directly from the big toe. If it is between two sizes, take the longest one.
- 5 Measure both feet.
- 6 This measurement provides only an approximation for the required shoe size. From one shoe model to another size may differ from the actual foot size.
